PROFILE

Fullstack developer with a Frontend focus and 5+ years of experience with React, Next.js and TypeScript. Two years in product and high-traffic e-commerce teams (Frávega, Jumbo, Easy, Sarkany) and three building, shipping and monetising my own SaaS products end to end, including LLM integration. Used to owning the whole product lifecycle, from the interface, authentication and database to payments and deployment.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3/SASS
Frontend	React, Next.js, Astro, Tailwind CSS, Styled Components, Storybook
Backend & databases	Node.js, Supabase, NeonDB, Prisma, Better-Auth, RESTful APIs
AI & payments	LLM integration (DeepSeek API), Lemon Squeezy
Testing	Jest, React Testing Library
Tools	Git, GitHub, Vercel

EXPERIENCE

Prosalimpia — Independent Fullstack Developer — Founder Mar 2023 - Present

Own products

- Single-handedly designed, built, shipped and monetised Prosalimpia, an AI-powered proofreading SaaS (Next.js 16, Supabase, DeepSeek API).
- Built a three-tier freemium subscription model with Lemon Squeezy, with a daily word quota on the free plan and paid plans adding quota and text analysis.
- Built a custom CMS (Next.js 16, Prisma, NeonDB, Better-Auth) that powers an Astro frontend.
- In parallel, seasonal work in viticulture and winemaking.

Steplix — Frontend Web Developer Aug 2022 - Mar 2023

- Built a Storybook component library on the brand's colour system; it became the foundation of most of the company's products, including its corporate site.
- Built and maintained web applications with React, Next.js and TypeScript.
- Refactored much of the existing codebase into a modular architecture of reusable components, improving performance and UI smoothness.
- Worked in agile teams alongside UI/UX designers and backend developers.

CoreBiz — Frontend Web Developer Sep 2021 - Sep 2022

- Built mobile-first e-commerce interfaces for high-traffic platforms with React and advanced CSS architectures.
- Integrated RESTful APIs and state management for reliable data synchronisation.
- Shipped features on major retail sites including Sarkany, Frávega, Easy and Jumbo.

KIGÜI — Frontend Web Developer (part-time) Feb 2021 - Feb 2022

B2B platform that alerted companies about their products' expiry dates

- Built the platform's dashboard frontend in React, integrating it with the existing API.
- Worked on migrating the backend from Ruby on Rails to Django to modernise the platform.
- Implemented dynamic forms, user authentication flows and interactive components.

FEATURED PROJECTS

Prosalimpia prosalimpia.com

Production SaaS that fixes spelling, grammar and style with AI while keeping the writer's own voice. Freemium model with Free, Plus and Full plans and active paying subscribers.

Stack: Next.js 16, TypeScript, Supabase, DeepSeek API, Lemon Squeezy, Tailwind CSS

El Diario de Matí eldiariodemati.com

Personal blog of stories, poems and a year of travel that reads like a notebook of dated letters and shifts with the light at the hour of the place I'm writing from. Content comes from a custom CMS.

Stack: Astro, Next.js 16, NeonDB, Prisma, Better-Auth, Tailwind CSS

CasualApp apptime-two.vercel.app

App to track work shifts and calculate income and taxes.

Stack: Next.js, TypeScript, Prisma, Tailwind CSS, Vercel

disposable-check npmjs.com/package/disposable-check

Zero-dependency TypeScript library that detects disposable emails (Mailinator, 10minutemail and about 10,000 other domains). Subdomain-aware, auto-updated blocklist, runs on Node, edge and browsers.

Stack: TypeScript, npm
